

Product Color Run Sheet (Explanation and Usage)

The attached sheets have been prepared to assist in the selection of Flagstone Pavers. *Your failure to use this document before placing your order could cause you unnecessarily having to reselect colors and or shapes with your customers. Additionally, production delays could occur.* Please refer to the most recent revision (updated annually) of the rules for which “Products” (color and shape combinations) are available for production.

Stock – These are no guarantee that this product will always be “in stock”. We set aside production time to produce this product for stock each time this shape is run. However, orders could consume all (all more) of the planned stock run.

MTO (Made to Order) – This product is not normally “stocked” but can be produced when the shape is put in production.

Cube Minimum – This is a color and shape combination that is not stocked and must be ordered in the quantity indicated for the product to be produced. Check our “availability list” and or production schedule if your order fails to meet this minimum quantity before selecting another product, as we may have already produced (or may be scheduled to produce) enough to cover your order.

N/A (not available) - This is a color and shape combination that requires a minimum of 3,000 square feet for the product to be considered for production. A non-refundable deposit may be required.

*(Blue) – Check on availability, minimum quantities, and current pricing. Blue orders cannot be cancelled after the pigment (cobalt) has been ordered.

Product Data Sheet (Explanation and Usage)

The attached sheets have been prepared to assist in ordering and shipping Flagstone Pavers. Please refer to the most recent revision (updated annually) of this document.

Piece/Square Foot - All products are sold by the square foot, except those from the St. Augustine Collection that are used for circles and fans.

Full/Partial Cubes - In most cases, we accept orders rounded to the nearest band (for full size 60mm pavers) or layer (for thin 30mm pavers).

Cube/Pallett – Generally, full size pavers (60mm) are cubed and not shipped on palletts, while thin pavers are shipped with palletts. Palletts can be requested in cases where they are not normally used for an upcharge.

Units Per Cube/Band and Pallett/Layer - The installation patterns provided in our Shapes & Patterns Section of this brochure indicate ratios by units (number of pieces) of each shape per a given square foot area, not by percentages (%) of each shape in the pattern. Ratios by unit are more accurate than ratios by percentages (%).
