

### RUMBLESTONE™ COLLECTION

RumbleStone Bench and Fire Pit in Café

Flagstone's innovative RumbleStone™ provides a set of rustic building blocks for your outdoor hardscape projects. Simple to complex, large or small, the possibilities for creative expression are as far and wide as your imagination. The six tumbled RumbleStone sizes modulate in all dimensions and can be assembled in a variety of configurations and orientations. In addition to simple running bond patterns, the stones can be easily stacked with insets, moved forward and backward, horizontally and vertically, for more aesthetically pleasing visual relief and texture. Also, the 3.5-inch base module works with common dimension lumber for benches and pergola posts. Stack 'em up and bond with construction adhesive.

RUMBLESTONE SQUARE  
7"L x 7"W x 1 3/4"H \*

RUMBLESTONE MINI  
7"L x 3 1/2"W x 1 3/4"H \*

6 1/2" - 10 1/4"L x 7"W x 3 1/2"H \*

# RUMBLLED WALL | FIRE PIT | GEOSTONE

## OUTDOOR LIVING

### RUMBLLED WALL

8" wide x 16" long x 4" thick  
Weight: 40 lbs.

Rumbled Wall is a tumbled, modular wall product designed to bring old world charm to your outdoor living spaces. Product can be dry stacked or mortar set to create many different looks. Popular configurations include seating walls, landscape walls, columns, planters, grill enclosures, stairs and fire pits. The Rumbled Wall is available in Cream / Beige / Charcoal, Gray / Charcoal, and Indian Summer.

### FIRE PIT

Trapezoidal Block: 8" wide x 10" front x 6.5" back x 4" thick  
Weight: 25 lbs.

Fire Pit is a 31" inside diameter freestanding pit that comes with an "American Made" high quality steel insert which is formed out of 10-gauge steel, and painted with high temperature, heat resistant, nontoxic black enamel paint. Sold in 12" tall (three rows high) or 16" tall (four rows high) pre-made kits that include blocks, glue, and steel ring. The fire pit is available in Cream / Beige / Charcoal, Gray / Charcoal, and Indian Summer.

### GEOSTONE

4" high, 18" wide, and 12" deep  
Weight: 36lbs

Geostone Walls achieve some of the highest "Pullout Strength" and "Connection Strength" test results in the industry. What makes the Geostone such a powerful wall system is the open core design. This unique design creates a system of interconnecting spaces in the wall. These spaces are filled with angular crushed stone to lock the blocks together. The friction resistance of this "Rock-Interlock Connection" is amongst the most powerful mechanical wall connection methods in the industry.
